• Banking Website Project

- **Project Title:** Online Banking System

- **Overview:** The Online Banking System is a dynamic web application designed to provide users with a seamless and secure banking experience. This project aims to simplify banking operations, allowing users to manage their accounts, transfer funds, and access financial services from the comfort of their homes.

- **Key Features:**

- **User Authentication:** Secure login and registration system to ensure user privacy and data protection.

- **Account Management:** Users can view their account balances, transaction history, and manage personal information.

- **Fund Transfers:** Easy and secure transfer of funds between accounts, with real-time transaction updates.

- **Bill Payments:** Users can set up and manage bill payments, ensuring timely payments and reducing late fees.

- **Responsive Design:** The website is fully responsive, providing an optimal viewing experience across various devices, including desktops, tablets, and smartphones.

- **Technologies Used:**

- **Front-End:** HTML, CSS, JavaScript, React, Bootstrap
- **Back-End:** Django (Python) for server-side logic and RESTful API development
- **Database:** PostgreSQL for secure and efficient data storage
- **Version Control:** Git for version management and collaboration
